TEMITOPE BENEDICT WAHEEB

Geospatial Scientist · Remote Sensing and GeoAI · Geoscientist

Ibadan, Nigeria · +234 703 455 4426 · waheebtemitope@gmail.com

ORCID 0009-0009-2401-6481 · GitHub · Portfolio · LinkedIn

PROFILE

Geospatial scientist and geoscientist with an MSc in Geographic Information Science, a BSc in Geology, and four years of applied experience across remote sensing, spatial analysis, machine learning and field geoscience. Work spans deep learning for Earth observation, spatio-temporal data mining, explainable machine learning for environmental and disaster risk, groundwater and flood modelling, and subsurface characterisation. Two publications and four manuscripts under review, winner of the 2026 Esri Young Scholar Award for Nigeria, recipient of the Geoscience and Remote Sensing Society West Africa Best Poster Award, and founder of GeoDev Lab Africa, a pan-African developer programme that enrolled 565 participants in its first cohort. Outside research, co-founded CLIMORA Initiative, a youth climate action organisation that has reached over 4,000 young people, and runs a free scholarship education platform for African graduates and a student-led charity that pays tuition for students at risk of dropping out. Comfortable owning a problem from raw data through modelling and validation to a deliverable that decision-makers can act on.

EDUCATION

Full Stack Software Engineering (12-month programme) ***2026 – Present***
AltSchool Africa, School of Engineering. In progress.

MSc, Geographic Information Science ***2025***
University of Ibadan, Nigeria. CGPA 6.05 / 7.00 (First Class equivalent).

- Dissertation: Pattern of Air Pollutants and Land Surface Temperature in Nigeria Using Space-Time Pattern Mining Techniques.
- Awarded Best Master's Research Dissertation, Department of Geography.

BSc, Geology ***2023***
University of Ibadan, Nigeria. CGPA 3.15 / 4.00.

- Thesis: Mineralogical and petrographic characterisation of trona deposits, Lake Chad perimeter, Republic of Chad.

Associate Degree (National Diploma), Geology ***2014 – 2016***
Federal Polytechnic, Ede, Nigeria. CGPA 3.59 / 4.00.

STANDARDISED TEST SCORES

GRE (2025) Total 329 / 340. Quantitative Reasoning 170 / 170. Verbal Reasoning 159 / 170.

IELTS Academic (2025) Overall 7.5. Listening 7.5, Reading 8.5, Writing 7.0, Speaking 7.0.

RESEARCH EXPERIENCE

Graduate Research Assistant, Department of Geography ***Sept 2024 – Present***
University of Ibadan, Ibadan, Nigeria

- Created and managed space-time cubes in ArcGIS Pro across five variables (four Sentinel-5P TROPOMI pollutants and MODIS land surface temperature) over all 37 Nigerian administrative units and 72 monthly time steps, applying Mann-Kendall trend tests, Sen's slope, emerging hot spot analysis and time series clustering.
- Processed and harmonised large-scale satellite archives (MODIS MOD11A1 and Sentinel-5P) via Google Earth Engine and automated monthly zonal aggregation to state level in ArcPy, generating a continuous 2019 to 2024 time series per variable.
- Developed and benchmarked three forecasting models (curve fit, Holt-Winters exponential smoothing and forest-based regression), evaluating performance by RMSE; the forest-based model achieved the lowest

error in 65 percent of states at a mean of 1.22 degrees Celsius, with Friedman and Nemenyi tests confirming significance.

- Designed and conducted a deep learning study benchmarking SegFormer-B2 and Mask2Former against the purpose-built MariNeXt baseline on the MADOS marine pollution dataset, adapting both to four-channel Sentinel-2 input by weight inflation of pretrained filters, reaching a mean intersection over union of 0.726 against a published 0.643.
- Developed an explainable GeoAI flood susceptibility pipeline for the Upper Benue Basin combining a Sentinel-1 SAR inventory with fifteen conditioning factors, benchmarking XGBoost, CatBoost and TabNet, and propagating a five-model NEX-GDDP-CMIP6 ensemble through the trained model to project exposure under SSP2-4.5 and SSP5-8.5.

Research Assistant, PiLAF Innovation Lab ***Mar 2024 – Jan 2026***

Innovation Lab for Policy Leadership in Agriculture and Food Security, Ibadan, Nigeria

- Conducted spatio-temporal analysis of climate change impacts on cereal crop yields across all 37 Nigerian states using secondary data from the CGIAR Adaptation Atlas.
- Developed Python workflows in Pandas, GeoPandas, Matplotlib and Seaborn for data cleaning, statistical modelling and spatial visualisation of projected yield scenarios.
- Performed vulnerability and yield gap assessments, identifying high-risk states such as Plateau (minus 1.76 t/ha) and the Federal Capital Territory (minus 1.60 t/ha) as priority adaptation zones.
- Produced policy-relevant outputs, including boxplots, choropleth maps and tabular summaries highlighting crop-specific risk and resilience, with thesis-standard interpretation and recommendations.

Lead Researcher, Bherney Spatial Consult ***Mar 2023 – Present***

Ibadan, Nigeria

- Computed a Heat Risk Index for Ibadan by integrating land surface temperature with ecological and demographic indicators, identifying central local government areas as urban heat hotspots and recommending strategic tree-planting sites.
- Examined land use and land cover change from 1983 to 2023 against land surface temperature and ecological indicators (NDVI, NDBI, MNDWI), quantifying vegetation decline from 48.8 to 25.2 percent and built-up expansion from 5.9 to 27 percent, with LULC to LST correlation of R-squared 0.87 to 0.89.
- Applied the Analytical Hierarchy Process and GIS-based multi-criteria decision making, integrating DEM, rainfall, drainage density, topographic wetness index and land use to produce flood risk maps identifying southern Anambra near the River Niger as very high-risk.
- Integrated vertical electrical soundings, remote sensing and GIS-based AHP to delineate groundwater potential zones, generating thematic maps and classifying potential, with only 0.42 percent of the study area in high-potential zones.
- Evaluated vegetation response to climate variability in Sokoto and Zamfara from Sentinel-2 NDVI time series (2002 to 2022), finding stronger rainfall correlations in Sokoto and greater climate vulnerability.

Research Assistant, Department of Geology ***Mar 2023 – Present***

University of Ibadan, Ibadan, Nigeria

- Characterised trona mineralogy at the Lake Chad perimeter by preparing thin sections, processing samples for X-ray diffraction and interpreting diffraction patterns to determine mineral composition and economic significance.
- Trained and validated SVM, Random Forest, XGBoost and LSTM models on well-log data for petrophysical property prediction, comparing accuracy and interpretability across architectures.
- Conducted a carbon capture and storage review, synthesising literature on utilisation strategies, challenges and upstream business prospects, presented at a workshop and awarded best paper.
- Delivered a seminar on alluvial fan depositional environments, reviewing wireline logs and reservoir characteristics with implications for petroleum exploration and reservoir modelling.

Research Assistant, International Student Research Collaboration ***Jan 2023 – Dec 2023***

Universities of Bedfordshire, Stirling and Kingston London, United Kingdom

- Collaborated with postgraduate researchers across three UK universities, contributing to project design, data interpretation and dissertation-level reporting.

- Oil spill research (Stirling): analysed regulatory oil spill records and stakeholder reports from the Niger Delta to identify statistically significant temporal spill patterns, attribute responsibility and evaluate environmental policy gaps.
- Food waste management (Bedfordshire): conducted a systematic literature review on food waste causes and barriers in the UK hospitality sector, assessed against the WRAP waste hierarchy.
- Green economy transition (Kingston): designed and supported survey-based data collection on awareness and barriers to net-zero adoption among construction businesses.

PROFESSIONAL EXPERIENCE

Founder, GeoDev Lab Africa ***Jun 2026 – Present***

Pan-African geospatial developer training initiative

- Founded and lead a free, project-based programme addressing a structural gap in African geospatial education: institutions produce GIS analysts who run an analysis once by hand, not developers who build systems that run repeatedly and serve other people.
- Designed a 52-week, twelve-month curriculum in two phases, built around a single continuous project each participant extends month by month, from problem definition and data through applications, databases and services to advanced capabilities including GeoAI.
- Grew Cohort One to 565 registered participants from 24 countries across five continents with no advertising spend; cohort commenced 1 September 2026.
- Recruited developer mentors and industry speakers, produce weekly recorded tutorials, and measure learning outcomes through pre- and post-programme assessment.

Graduate Mentee, Geomatics Nigeria Limited ***Apr 2026 – Present***

Ibadan, Nigeria

- Contribute to the water, sanitation and hygiene (WASH) programme, conducting field campaigns in rural communities to collect groundwater samples and record GPS coordinates for every sampling point.
- Joined laboratory water quality results to their georeferenced collection points and applied spatial interpolation to map continuous contamination surfaces, delineating affected areas from point observations.
- Support the firm's hydrogeological and environmental sustainability portfolio, including rural groundwater quality prospect mapping, water supply planning and natural resource management.

GIS and Data Management Intern, Prime TEC Data and GIS Solutions ***Jun 2026 – Sep 2026***

Ibadan, Nigeria

- Extracted, cleaned and structured OpenStreetMap infrastructure data in QGIS and ArcGIS Pro, producing validated layers with consistent attribute schemas and coordinate reference systems.
- Audited and documented 33 open geospatial data sources for Nigeria covering boundaries, settlements, roads, population, health, education and land cover.
- Contributed to dashboard development, research proposals and branded document work.

GIS Analyst (Land Administration), Kwara State Geographic Information Service ***Oct 2025 – Dec 2025***

Ilorin, Nigeria

- Digitised cadastral parcels in QGIS and linked each to its supporting land documents, making title and ownership records retrievable directly from the map.
- Standardised parcel attribute schemas and coordinate reference systems to support consistent land-record management.
- Supported quality assurance on the parcel database, checking geometry and attribute integrity across digitised records.

Data Analyst, TheKrediBankNG ***Oct 2023 – Jun 2024***

Lagos, Nigeria

- Conducted descriptive and predictive data analysis contributing to a 15 percent increase in operational efficiency.

- Designed and built infographics and interactive dashboards that improved stakeholder engagement by 25 to 35 percent.
- Applied Power BI, Excel and Python to optimise reporting systems and strengthen organisational decision-making.

Data Processor and Analyst, Analyst Data Services and Resources ***Aug 2023 – Jul 2024***
Ibadan, Nigeria

- Designed and implemented survey methodologies that achieved a 95 percent response rate, ensuring data validity and reliability.
- Extracted and analysed complex datasets, delivering insights that improved client decision-making outcomes by around 20 percent.
- Developed automated data workflows that reduced processing time by 30 percent, and applied statistical and geospatial methods to turn raw data into actionable information.

GIS Analyst, GISKonsult Academy ***Jan 2022 – Jun 2023***
Ibadan, Nigeria

- Executed geospatial data collection and analysis projects, including mapping Adeyi Avenue and digitising rural and urban features of Akungba using ArcGIS Pro.
- Produced and delivered over 20 map products integrating field survey notes, GPS data and spatial analysis.
- Collaborated on applied GIS solutions for community planning and development projects.

Assistant Geologist, AHMU Mining Company ***Feb 2021 – Jun 2022***
Ibadan, Nigeria

- Contributed to Environmental Impact Assessments for quarry sites.
- Assisted in tourmaline exploration at Komu Village, supporting resource evaluation and site mapping.
- Developed routing maps and operational layouts for mining activities.

Assistant Geophysicist, AHMU Mining Company ***Dec 2016 – Dec 2018***
Ibadan, Nigeria

- Carried out well-logging and data interpretation for borehole drilling at 10 sites, ensuring sufficient water yield.
- Performed geophysical surveys and resistivity analyses for groundwater exploration.
- Authored technical reports integrating field data and interpretation for hydrogeological assessments.

LEADERSHIP AND VOLUNTEER EXPERIENCE

Founder and Programme Lead, GeoDev Lab Africa ***2026 – Present***
Free pan-African geospatial developer programme (see Professional Experience)

- Lead a first cohort of 565 enrolled participants from 24 countries, a team of volunteer developer mentors and invited industry speakers through a 52-week curriculum delivered at no cost to learners.

Co-founder, CLIMORA Initiative ***2025 – Present***
Youth climate action organisation, Ibadan, Nigeria

- Co-founded an initiative that moves young people from climate awareness to practical action; it has reached over 4,000 young people across Ibadan and the University of Ibadan community.
- Delivered a climate action outreach at Community High School, Bodija, that led to a student-run Green Club and a waste-to-wealth scheme replacing paper burning with collection for recycling, linked to Verdiq Recycling.
- Brought GIS into climate education, presenting a 2004 to 2025 land surface temperature analysis of Ibadan so students could see climate change in their own city.

Founder, scholarshipswith_nhimiloh ***2023 – Present***
Scholarship education platform for African graduate students (Instagram)

- Teach African graduates how to find hidden and lesser-known funding, build competitive academic profiles and write strong personal statements.

- Built free tools for African graduates, including a scholarship guidebook, application tracker, eligibility checklist and profile-building guides, and created the ScholarWin Blueprint, a seven-chapter guide with a tracker spreadsheet, statement swipe file and eligibility checklist.
- Building ScholarWin, a web application for scholarship matching, essay coaching and application tracking.

Founder, The Amity Charity Initiative ***2020 – Present***
Student-led nonprofit, Nigeria

- Lead teams across six Nigerian universities that raise funds to pay tuition for students who would otherwise drop out, with evidence of each payment reported back to donors.
- Organise a yearly outreach to a home for people with special needs.

Volunteer Administrator and Trainer, University of Ibadan GIS Community
University of Ibadan, Nigeria

- Run the community's free ArcGIS Pro training programme, which has trained over 500 undergraduates, 60 postgraduates and 20 academic staff across six departments.
- Led the 30-Day ArcGIS Pro Challenge, which involved over 500 students and faculty members.

Esri Young Professionals Network Ambassador ***2026 – Present***
Esri Young Professionals Network

- Hold both the Content Ambassador and Community Ambassador badges; write for the YPN blog and share Esri learning resources with young geospatial professionals in Nigeria.

Lead, Geoinformation Society of Nigeria (GEOSON) Youth Community ***2023 – Present***
University of Ibadan, Nigeria

Student Representative, Geo-Information Science Student Association ***2024 – Present***
University of Ibadan, Nigeria

Volunteer Trainer, Workshops and Community Training
Ibadan, Nigeria

- Delivered a three-day GIS workshop for GeoFellas, a geoscience student community.
- Trained ACCB presenters in scientific poster design.
- Facilitated a Spatial and Data Science Society of Nigeria workshop on space-time pattern mining, and a Power BI programme with Skills Academy, Bodija, Ibadan for over 100 participants (see Teaching and Capacity Building).

Founder, Rockite Research Club ***2022 – 2023***
Department of Geology, University of Ibadan

- Trained 35 students in literature reviews, systematic reviews and conference abstract preparation.
- Successful abstract submissions rose by 40 percent, and student participation at NAPE, NAEGE and NMGS conferences rose by 60 percent the following year.

Deputy Editor-in-Chief, Rockite Press Club ***2021 – 2023***
Department of Geology, University of Ibadan

Waheeb, T. B. (2023). Carbon Capture Sequestration and the Upstream Business: Utilisation, Prospects and Challenges. Nigerian Association of Petroleum Explorationists Student Mock Paper. **Second Best Paper.**

Waheeb, T. B. (2023). Alluvial Fan Depositional Settings: Recognition from Wireline Logs and Its Place in Petroleum Reservoir. Departmental Seminar, Department of Geology, University of Ibadan.

TEACHING AND CAPACITY BUILDING

Co-Facilitator, Postgraduate GIS Courses (GIS 784 and GIF 702) ***2024 – Present***

Department of Geography, University of Ibadan, Nigeria

- Teach remote sensing fundamentals, image preprocessing, spectral indices, supervised and unsupervised classification with accuracy assessment, change detection, Markov and land change modelling, and DEM-based hydrological analysis across ArcGIS Pro, Idrisi Selva and Google Earth Engine.
- Trained over 500 undergraduates, 60 postgraduates and 20 academic staff across six departments in ArcGIS Pro as volunteer administrator of the University of Ibadan GIS Community.
- Trained 20 students and 15 staff of the Institute of Child Health, College of Medicine, University of Ibadan, in spatial epidemiology with GeoDa, in collaboration with Associate Professor Tolulope Osayomi (2025).

- Facilitated a Spatial and Data Science Society of Nigeria workshop on space-time pattern mining with the space-time cube in ArcGIS Pro, producing the facilitator guide, participant workbook and delivery materials.
- Delivered a Power BI programme with Skills Academy and Data Science Nigeria training over 100 participants, and ran Google Earth Engine JavaScript API workshops for graduate colleagues.
- Taught 50 penultimate-year geography students statistical analysis with SPSS, Kobo Toolbox, ArcGIS spatial statistics and Excel, and mentored final-year students on RStudio for spatial statistics.
- Facilitated hands-on sessions for 15 graduate students on digital elevation models, watershed delineation, stream extraction and geospatial analysis in ArcGIS Pro.

SCIENCE COMMUNICATION AND AUTHORSHIP

- **Beyond Maps: Fundamentals of Geographic Information Systems.** Sole-authored 24-chapter introductory textbook on geographic information science, currently in production.
- **Public technical writing.** Publish GIS and geospatial AI explainers on LinkedIn and X, translating remote sensing, spatial statistics and machine learning methods into plain language, with a library of illustrated carousel explainers and long-form articles.

HONOURS, AWARDS AND FELLOWSHIPS

- **Winner, Esri Young Scholar Award, Nigeria (2026).** For work on air pollutant and land surface temperature patterns using space-time pattern mining; project showcased in the Map Gallery at the Esri User Conference, San Diego.
- **Michael Taiwo Scholar (2026).** Selected from 9,198 applicants across Nigeria.
- **Fellow, African Climate Intervention Fellowship for Early-Career Researchers (ACIFER) 2026**, Solar Radiation Management track. Selected from over 800 applicants across Africa.
- **Esri Young Professionals Network Ambassador (2026).** Holder of both the Content Ambassador and Community Ambassador badges.
- **Best Master's Research Dissertation**, Department of Geography, University of Ibadan (2025).
- **Best Poster**, Geoscience and Remote Sensing Society West Africa Poster Competition (2025).
- **Second Best Paper**, Nigerian Association of Petroleum Explorationists Mock Paper Competition, on carbon capture and sequestration (2023).
- **Winner, AEC Global Quiz**, Nigerian Association for Engineering Geologists and the Environment (2023).
- **Overall Best (three times), Chevron Booth NAPE Competition**, on seismic interpretation and reservoir characterisation (2023).

CERTIFICATIONS AND ADVANCED TRAINING

Esri MOOCs: Spatial Data Science: The New Frontier (2024), GIS for Climate Action (2024), Imagery in Action (2024), Making an Impact with Modern Geo Apps (2024), Going Places with Spatial Analysis (2023).

Leadership and Development (YALI Network Online Courses, Young African Leaders Initiative, 2026): Servant Leadership: The Deciding Difference; Fundamentals of Responsible Leadership for Entrepreneurs; Management Strategies for People and Resources; Workforce Collaboration and Development; Organizational Development for Volunteer-Based Initiatives; Strategies for Personal Growth and Development; Fundamentals of Grant Writing; Fundraising Concepts; Fundamentals of Starting and Running a Business; The Resilient Entrepreneur: Planning, Adapting and Persevering; Digital Marketing for Entrepreneurs; Effective Communication for Healthy Outcomes; Mental Health and Wellness; Understanding Renewable Energy.

Data and Programming: Data Analytics, ALX (2024); Introduction to Python Programming, ALX (2023); Industrial GIS Package, GISKonsult (2023).

Other: Emerging Africa Researcher Training, Department of Science and Innovation, South Africa (2022); Health, Safety and Environment, Impactiverse Consult (2021).

Workshops: GIS for Quantitative Spatial Data Analysis, Wheeler Institute for Business and Development, London Business School (Python, GeoPandas, QGIS, Google Earth Engine; replicated Storeygard 2016 on

transport costs and urban growth in Tanzania); Africa Agriculture Adaptation Atlas User Testing, PiLAF; Observe, Survey, Map and Draw Relations with Nature, IFRA-Nigeria and Ecole Nationale d'Architecture de Strasbourg.

TECHNICAL SKILLS

Programming: Python (advanced), JavaScript (Google Earth Engine API), R, SQL, HTML, CSS.

Deep Learning: PyTorch, transformer segmentation (SegFormer, Mask2Former), TabNet, multi-layer perceptrons, transfer learning and weight inflation for multispectral input.

Machine Learning: scikit-learn, XGBoost, CatBoost, LightGBM, Random Forest, SVM, LSTM, ensemble design, hyperparameter tuning, cross-validation, class-imbalance handling.

Explainable AI: SHAP, Accumulated Local Effects, partial dependence, permutation importance.

Geospatial Data Science: GeoPandas, rasterio, GDAL, NumPy, Pandas, Matplotlib, Seaborn, ArcPy, geemap, earthengine-api, GeoDa.

Remote Sensing: Sentinel-1 SAR, Sentinel-2 MSI, Sentinel-5P TROPOMI, Landsat 5/8/9 Collection 2, MODIS, VIIRS, ERA5-Land, CHIRPS, NEX-GDDP-CMIP6, GHS-POP, WorldPop, Copernicus DEM.

Spatio-Temporal Analysis: space-time cube construction, emerging hot spot analysis, Getis-Ord Gi*, Mann-Kendall and Sen's slope, time series clustering, local outlier analysis, forest-based forecasting.

Geoscience: thin-section petrography, X-ray diffraction, well-log and wireline interpretation, vertical electrical soundings, resistivity analysis, ICP-OES and ICP-MS geochemistry, reservoir characterisation.

Platforms and GIS: Google Earth Engine, ArcGIS Pro 3.7, ArcMap, ArcScene, ArcGIS Online, QGIS, ERDAS Imagine, Idrisi, Digital Earth Africa Sandbox, ArcGIS Dashboards, Experience Builder, Instant Apps, StoryMaps, Power BI, Tableau, R Shiny.

Data Collection and Office: Survey123, Kobo Toolbox, Google Forms; Microsoft Office, Google Workspace, Power Query, Power Pivot, Power Automate, SPSS, EViews, Canva; web design (WordPress, Wix, Google Sites, HTML, CSS, JavaScript).

PROFESSIONAL AFFILIATIONS

American Geophysical Union (AGU); African Association of Remote Sensing of the Environment (AARSE); Geoinformation Society of Nigeria (GEOSON); Spatial and Data Science Society of Nigeria (SDSSN); Society of Exploration Geophysicists (SEG); American Association of Petroleum Geologists (AAPG); Society of Petroleum Engineers (SPE); European Association of Geoscientists and Engineers (EAGE); Nigerian Association of Petroleum Explorationists (NAPE); Young Engineering Geologists (YEG); University of Ibadan ArcGIS Forum.
